Junior Web Developer graduating from **Southampton Solent University's BSc (Hons) Computing** course.

Currently located in Southampton, **moving to London by the 29th of July** (End of Tenancy at the current address). Passionate about Web Development, desired to become an experienced specialist in the industry and looking forward to become a part of web development team.

Skills and abilities

- **Web server deployment.** Ability to deploy a simple web server, basic knowledge of Linux shell (Ubuntu 18.10) and ability to install and configure a LAMP stack or similar.
- **Front-end experience.** Experience of creating responsive web pages using HTML, CSS, JavaScript ES5. Capability of creating custom Bootstrap components.
- **Entry-level experience of Laravel MVC Framework.** Knowledge of basic Laravel MVC principles, such as Routing, Eloquent ORM, Database migrations, Controllers and related PHP Artisan commands; Ability to set up Authentication module.
- **Use of MariaDB, PostgreSQL, phpMyAdmin, pgAdmin.** Experience with relational databases and a skill of creating CRUD queries and joining multiple tables into one.
- **Use of Version Control Software.** Ability of uploading commits to GitHub using Git Bash, Experience of cloning repositories/recent commits to the server.

Recent Projects

Despite the fact I have not had the experience in the industry yet, multiple projects were created during the university studies. Here are two recent projects related to Web Development:

eBay Price Analyzer - Final Year Project

krivoy.co.uk/demo
github.com/krivoykirill/ebayPriceTest
Presentation Poster created for the project

Final year project from the last year of Southampton Solent University.
The website connects to eBay API and generates statistics about eBay listings. More in-depth information is available in the links above.

- Server deployment, domain attachment
- **Laravel 5.7** with Authentication
- PostgreSQL 10, phpPgAdmin 5.1
- **Python 3.7**, Pandas, Scikit-learn
- eBay API, ebaysdk-python
- Chart.js, Moment.js
- Bootstrap 4

Landing page for a taxi company.

yandextaxilatvija.lv
https://github.com/krivoykirill/yandextaxilatvija-mikluha

My first ever side project. Landing page created for SIA "Mikluha", a taxi dispatching service in Riga, Latvia.
By the client's request, the website was based on "Industrious by TEMPLATED". The appearance was redone to meet the client's needs. A form submission process was implemented using php-cURL.
All submitted forms got sent to Bitrix CRM API using Webhooks.

- Communication with **Bitrix CRM API** using Webhooks
- UTM tags attachment to the form if specified in the query string
- Custom responsive CSS elements creation using media queries
- Server deployment, domain attachment
- Partial use of Bootstrap 4

Working experience

Central Convenience Stores

Supervisor (2018 - present)
Sales Assistant (February 2016 - 2018)

As a retail worker with a 3-year experience, the following skills have been involved into work:

- Customer service. Interaction with different people, product upsell.
- Stock taking
- Cash operations
- Keeping the shelves stocked
- Training new workers, ability to explain working processes to the beginners.

The only workplace in the UK I have had experience at. Have worked 25 to 45 hours a week depending on the university load during certain periods of the year.
Got promoted to supervisor position in 2018, reference is available on request.
